Introduction to Prescriber Services

Introduction

- Working with a Prescribing Clinician might feel different than how your therapist directs conversation. The Prescribing Clinician will be very direct asking you a variety of questions to ensure that you receive the best care with minimal side effects and also gather a more comprehensive history to make collaborative decisions with patients.
- The Prescribing Clinician may start off your services by meeting with you for your Intake Assessment appointment and then will follow up with you for returned visits at various frequencies based on your presenting symptoms and side effects. This allows the Prescribing Clinician to monitor and adjust your medications to get you to a place where you are satisfied. After your symptoms have been stabilized she may decrease the frequency of your appointments and provide refills that extend beyond 30 days.
- Prescribing Clinicians avoid calling in prescription refills without face to face visits as it is not possible to assess your current symptoms when appointments are missed. To avoid disruption in taking your medications as prescribed, please ensure you have an appointment scheduled prior to the end of your previous prescription.
- All prescriptions for controlled substances can only be prescribed at 30 day intervals and will not be provided for more than 30 days regardless of length of stabilization of symptoms. Prescriptions for controlled substances can never be refilled without an appointment.
- Please complete the measures sent to you through your patient portal. This will allow the Prescribing Clinician to review the results prior to the appointment so that they do not need to use the appointment to do so. These measures can be very helpful to track symptom improvement over time.

What to Bring to Your Appointment

1. A current and accurate list of your medications including names, dosages, and prescriber. Please bring the bottles if necessary.
2. If the Prescribing Clinician requests that you obtain labs or test results please bring to your appointment or fax them to us at 888-976-6019
3. If you are getting discharged from the hospital, please make sure that AACA has a copy of your discharge paperwork prior to your appointment. You will not be able to see the Prescribing Clinicians if we have not received the report.

Definition of Telehealth

Telehealth involves the use of electronic communications to enable Ann Arbor Counseling clinicians to connect with individuals using live interactive video and audio communications. Telehealth includes the practice of psychological health care delivery, diagnosis, consultation, treatment, referral to resources, education, and the transfer of medical and clinical data.

AACA utilizes secure, encrypted HIPAA compliant audio/video transmission software to deliver telehealth via G Suite Meet or other back-up telehealth platforms as needed.
4. AACA clinicians follow the State of Michigan Licensure and insurance requirements for delivering telehealth services.
5. By signing this document, I agree that certain situations, including emergencies and crises, are inappropriate for audio-/video-/computer-based psychotherapy services. If I am in crisis or in an emergency, I should immediately call 9-1-1 or seek help from a hospital or crisis-oriented health care facility in my immediate area.

Payment for Telehealth Services

Ann Arbor Counseling Associates will bill insurance for telehealth services when these services have been determined to be covered by an individual's insurance plan. The standard copay and/or deductibles would apply. In the event that insurance does not cover telehealth, you may wish to pay out-of-pocket, or when there is no insurance coverage. We can provide you with a statement of service to submit to your insurance company.
